

## Minutes of the IPM Symposium Program Committee Conference Call (05-07-10)

### Participants:

Margaret Appleby  
Carlos Bogran  
Dave Clement  
Naresh Duggal  
Dawn Gouge  
Norm Leppla  
Mary Kay Malinoski  
Elaine Wolff  
Mark Wright

### Agenda:

1. Theme: “IPM on the World Stage”
2. Decide upon a tag-line. “IPM Solutions for Global Pest Challenges”
3. Review and finalize the main session topics. The three topics seem appropriate: Management, Outreach, and Best Practices (without the word “tools.”). Each topic will include evaluation. Naresh will provide brief annotation to explain the topics.
4. Refine session subtopics. Mark will organize a session on biological control communication or outreach. We may have a session on bio-communication to include biosecurity due to societal concerns. Each formal session topic must have a designated organizer. Add a session on educating the next generation of IPM practitioners. Naresh will provide brief annotation to explain the topic major and minor categories proposed and confirm the table below has been updated correctly. There are 12 large breakout rooms in Memphis.
5. Decide on the venue for a reception on Monday night. Have the reception at the RockNSoul Museum. The RockNSoul Museum is about 1 mile from the Convention Center and there is a trolley. Do not have a speaker. The museum will be closed except for our group. Set-up food at various locations to encourage mixing. Have guided tours if available. Publicize the event early and encourage attendance. Monday night may not be such a travel problem in Memphis as it was in Portland. Allow more time for the event than at Portland. The museum can handle 400 people.
6. The next Program Committee conference call. The call will be on June 4<sup>th</sup> at 2:30 pm EST. Agenda topics will be planning for the call for sessions. We will develop a matrix of sessions similar to the process used for Portland. We also will consider brainstorming session topics.

**Dawn will be on a travel assignment so we need a volunteer to set up the conference line for the next meeting.**

Thanks to Norm for recording minutes.

<b>Integrated Pest Management</b>		
<b>Main Categories</b>	<b>Sub Categories</b>	<b>Presentations/Speakers</b>
<b>Management</b>	Policy Development	
	Digital Governance in IPM Programs/Projects	
	Reasons for IPM	
	Administrative Guidelines and Procedures	
	Program/Project/Process Development	
	Finance, Grant Development and Management	
	Discussion session on IPM curricula for and Grant Institutions	
	Evaluation	
<b>Outreach</b>	Collaborations and Alliances	
	Research, Trials and Demonstrations	
	Training Methods, Tools and Techniques	
	Audience Development	
	Extension Education – Agriculture	
	Extension Education – Community	
	Pesticide Applicator Safety Education and Worker Protection	
	Outreach on Biological Control	
	Biosecurity	
	Outreach to the Next Generation	
<b>Best Practices</b>	Structural	
	Home Gardening	
	Urban Turf and Landscapes – Residential	
	Urban Turf and Landscapes – Commercial	
	Urban Forestry	
	Natural Resource Invasive Pest Management/Forestry	

	Nuisance Wild Life Pest Management	
	Right-of-Way Vegetation Management on Roads, Trails and Airports	
	Aquatic Pest Management	
	Public Health Pest Management – Vertebrates	
	Public Health Pest Management - Invertebrates	
	Quarantine Pest Management	
	Agriculture Pest Management – Various Categories (Crops, Ornamentals, Horticulture etc	
	Preventing Air And Water Pollution	
	Evaluation	
	Impacts
